

Welcome to KWB

The Berlin Centre of Competence for Water

What do we do?

Research on urban water management (drinking water, wastewater, stormwater, groundwater, smart water infrastructure management)

- Demonstrate innovative water and wastewater treatment solutions
- Develop digital solutions for the water sector
- and much more: <https://www.kompetenz-wasser.de/en/forschung/projekte>

What are we offering?

- **Internships for 3- 6 months for Bachelors & Masters students who needed to leave Ukraine (or Russia or Belarus)**
- We can also jointly apply for public grants for a longer research stay in our institute, here are some options:
 - 1) <https://www.humboldt-foundation.de/en/apply/sponsors-hip-programmes/philipp-schwartz-initiative>
 - 2) <https://www.dbu.de/3045.html>

What can you do at KWB?

A) For hands-on engineers

Support ongoing water & wastewater treatment projects and optimize the operation of our pilot treatment systems.

B) For those who like the outdoors

Support our field work on monitoring the water cycle! Get your hands dirty in the name of science while getting to know Berlin.

C) For code addicts & data scientists

Would you like to use your R or Python skills to solve water & environmental challenges? We're already working on it.

D) For modellers

You already know or you'd like to learn how to model a wastewater treatment plant or how to manage salt content in irrigation? This one's for you.
